**Our Woodstock Residential Care Home residents got involved with a sensory, cognitive challenge on Wednesday 29 June.**

We gave them the task of **pairing up nuts and bolts** to see how many they could do in a timed session. We also got them to **sort the nuts and bolts by size from smallest to largest**.

This task involved good **hand-eye coordination** and encouraged everybody to use **reasoning**.

Those taking part had fun screwing and unscrewing the nuts and bolts and enjoyed **competing and cheering each other on**. *Great fun!*
