This week we have been busy creating our very own 'Reminiscence Corner' here at Woodstock Residential Care Home.

The Corner displays a collection of vintage items from the past, such as books, records, and other memorabilia which our residents can look at, touch and read at their leisure.

The display aims to simulate our residents' senses and minds, which can help spark happy memories from the past.

It was brilliant to see Michele and Rachel already making the most of the Corner. We are delighted with it and look forward to adding to it and watching our residents enjoy it.
