**Our ladies and gents at Woodstock Residential Care Home got to put their sense of smell to the test this week!**

For our sensory activity, we filled little pots with common smells including **orange, vinegar, mustard, pickle, tuna, herbs, coffee, cheese, marmite, lemon** and **blackcurrant squash**.

Our residents had to shut their eyes, take a good sniff and guess what their smell was (with clues for some of the trickier ones!).

*The session was lots of fun and a great way to stimulate our senses!*
