On Tuesday 28 June we created two sensory games for our residents at Woodstock Residential Care Home.

The first was a game called **'What's in the bag?'**. Our residents had to reach into a bag and describe all of the different things they could feel. We then revealed what was in the bag *and had a good laugh about some of the guesses that had been made!*

The second game involved residents putting their hands in a **tub of bubbly water** and having to reach around and find the two balls at the bottom.

The smell of the bubbles and textures and colours of the balls **stimulated sight, smell and touch**. *We all had fun getting our hands all bubbly!*

'What's in the bag?' and bubbly water game
