Our residents at Woodstock Residential Care Home played a sensory stimulation game recently – a board game with a difference!

The aim of the game – **'Smell & Tell'** – is to select a flask tin, have a go at guessing the smell, then to match it to the correct picture on the board. The person who guesses the most scents correctly wins the game.

We all enjoyed having a go at **matching the familiar scents to the pictures** and we think this will be a firm favourite with our residents.
