On Monday 5 September our residents at Woodstock Residential Care Home enjoyed getting creative together painting stones.

We used lots of **brightly coloured paints** to decorate the stones with beautiful patterns and messages to make them unique.

Each stone was carefully painted and **eye-catching**. We admired each others' creations and chatted about our memories from childhood. This activity was **great for concentration and focus**, and was very therapeutic.

We will be placing our stones around our garden and will also hide some in our local community for others to find and enjoy.
